3. Guidelines on SECP AML/CFT Regulations

The Guidelines are applicable to all Regulated Persons ("RPs") including Securities Brokers as defined under the SECP AML/CFT Regulations conducting relevant financial business and designed to assist RPs in complying with the Regulations. It supplements the Regulations and the AML/CFT regime by clarifying and explaining the general requirements of the legislation to help RPs in applying national AML/CFT measures, developing an effective AML/CFT risk assessment and compliance framework suitable to their business, and in particular, in detecting and reporting suspicious activities

4. What is Money Laundering?

Money laundering involves the placement of illegally obtained money into legitimate financial systems so that monetary proceeds derived from criminal activities are transformed into funds with an apparently legal source.

Money laundering has many destructive consequences both for society as a whole and for those entities involved in money laundering activities. With respect to society as whole, money laundering may provide resources for drug dealers, terrorists and other criminals to operate and expand their criminal activities.

With respect to entities, any involvement whether it be to instigate, assist, conceal, or ignore the source, nature, location, ownership or control of money laundering activities, can lead to both civil and criminal proceedings against both the individual and the entity involved .

Additionally, the adverse effects, including the adverse publicity to the Firm associated with involvement in money laundering events cannot be emphasized enough.

Money laundering transactions may include:

- Advising a potential or existing client on how to structure a transaction to avoid reporting and/or record keeping requirements;
- Engaging in any activity while willfully or recklessly disregarding the source of the funds or the nature of the Clients transaction;

- Engaging in any activity designed to hide the nature, location, source, ownership or control of proceeds of criminal activity;
- Dealing in funds to facilitate criminal activity; or
- Dealing in the proceeds of criminal activity.

Money laundering can involve the proceeds of drug dealings, terrorist activities, arms dealings, mail fraud, bank fraud, wire fraud or securities fraud, among other activities.

5. What Is Terrorist Financing?

Terrorist financing refers to the processing of funds to sponsors involved in or those who facilitate terrorist activity. Terrorist individuals/ groups/ organization derive income from a variety of sources, often combining both lawful and unlawful funding, and where the agents involved do not always know the illegitimate end of that income. The forms of such financing can be grouped into two types:

5.1 Financial Support - In the form of donations, community solicitation and other fundraising

initiatives. Financial support may come from states and large organizations, or from individuals.

5.2 Revenue Generating Activities - Income is often derived from criminal activities such as kidnapping, extortion, smuggling or fraud. Income may also be derived from legitimate economic activities such as diamond trading or real estate investment.

6. Risk Assessment And Applying A Risk Based Approach.-

- The SECP AML/CFT Regulations move emphasis from one-size-fits-all approach to Risk Based Approach ('RBA'), requiring BSPL to carryout ML/TF risk assessment and apply Risk Based Approach to prevent or mitigate ML and TF.
- BSPL, before determining what is the level of overall risk and the appropriate level and type of mitigation to be applied, take into account all the relevant risk factors, such as geography, products and services, delivery channels, types of customers, or jurisdictions within which it or its customers do business. As is the case for BSPL' overall risk management, BSPL' senior management should understand the nature and level of the risks that they are exposed to and ensure that systems and processes are in place to identify, assess, monitor, manage and mitigate ML/TF risks.
- The Risk Based Approach enables BSPL to ensure that AML/CFT measures are commensurate to the risks identified and allow resources to be allocated in the most efficient ways. BSPL should develop an appropriate RBA for their organization,

BRIDGE SECURITIES (PVT) LIMITED

structure and business activities and apply the RBA on a group-wide basis, where appropriate. As a part of the RBA, BSPL:

- i. Identify ML/TF risks relevant to them;
- ii. Assess ML/TF risks in relation to-
 - a. Their customers (including beneficial owners);
 - b. Products, services and transactions that BSPL offers; and
 - c. Their delivery channels.
- iii. Design and implement policies, controls and procedures that are approved by its Board of Directors to manage and mitigate the ML/TF risks identified and assessed;
- iv. Monitor and evaluate the implementation of mitigating controls and improve systems where necessary;
- v. Keep their risk assessments current through ongoing reviews and, when necessary, updates;
- vi. Document the Risk Based Approach including implementation and monitoring procedures and updates to the Risk Based Approach; and
- vii. Have appropriate mechanisms to provide risk assessment information to the Commission.

- Under the RBA, where there are higher risks, BSPL are required to take enhanced measures to manage and mitigate those risks; and correspondingly, where the risks are lower, simplified measures may be permitted. However, simplified measures are not permitted whenever there is a suspicion of ML/TF. In the case of some very high- risk situations or situations which are outside BSPL's risk tolerance, BSPL may decide not to take on the accept the customer, or to exit from the relationship.

- Since the nature of the TF differs from that of ML, the risk assessment must also include an analysis of the vulnerabilities of TF. Many of the CFT measures entities have in place will overlap with their AML measures. These may cover, for example, risk assessment, CDD checks, transaction monitoring, and escalation of suspicion and liaison relationships with the authorities. The guidance provided in these guidelines, therefore, applies to CFT as it does to AML, even where it is not explicitly mentioned.

7. New Products, Practices and Technologies.-

and kept on record together with all internal findings and analysis done in relation to a suspicion irrespective of the fact that transaction is subsequently reported or not.

- The employees of BSPL are strictly prohibited to disclose the fact to the customer or any other quarter that a STR or related information is being or has been reported to any authority, except if required by law.

BSPL without disclosing the contents of STRs, BSPL intimate to the Commission on bi-annual basis the number of STRs reported to FMU and the BSPL ensure that status report (indicating No. of STRs only) BSPL reach the AML Department within seven days of close of each half year.

A suspicious activity will often be one that is inconsistent with a customer's known, legitimate activities or with the normal business for that type of account. Where a transaction is inconsistent in amount, origin, destination, or type with a customer's known, legitimate business or personal activities, the transaction must be considered unusual, and BSPL should put "on enquiry". BSPL should also pay special attention to all complex, unusual large transactions, and all unusual patterns of transactions, which have no apparent economic or visible lawful purpose.

- Where the enquiries conducted by BSPL do not provide a satisfactory explanation of the transaction, it may be concluded that there are grounds for suspicion requiring disclosure and escalate matters to the AML/CFT CO.
- Enquiries regarding complex, unusual large transactions, and unusual patterns of transactions, their background, and their result should be properly documented, and made available to the relevant authorities upon request. Activities which should require further enquiry may be recognizable as falling into one or more of the following categories. This list is not meant to be exhaustive, but includes:
 - (1) any unusual financial activity of the customer in the context of the customer's own usual activities;
 - (2) any unusual transaction in the course of some usual financial activity;

Depending on the type of business BSPL conducts and the nature of its customer

portfolio, BSPL may wish to set its own parameters for the identification and further investigation of cash transactions.

- Where BSPL has been unable to satisfy that any cash transaction is reasonable, and therefore should be considered as suspicious. BSPL is also obligated to file Currency Transaction Report (CTR), for a cash-based transaction involving payment, receipt, or transfer of Rs. **Two million** and above.
- If BSPL decides that a disclosure should be made, the law requires BSPL to report STR without delay to the FMU, in standard form as prescribed under AML Regulations 2018.
- The process for identifying, investigating and reporting suspicious transactions to the FMU should be clearly specified in the reporting entity's policies and procedures and communicated to all personnel through regular training.
- BSPL is required to report total number of STRs filed to the Commission on bi- annual basis within seven days of close of each half year. The CO should ensure prompt reporting in this regard.
- Vigilance systems should require the maintenance of a register of all reports made to the FMU. Such registers should contain details of:
 - (1) the date of the report;
 - (2) the person who made the report;
 - (3) the person(s) to whom the report was forwarded; and
 - (4) reference by which supporting evidence is identifiable.

It is normal practice for BSPL to turn away business that they suspect might be criminal in intent or origin. Where an applicant or a customer is hesitant/fails to provide adequate documentation (including the identity of any beneficial owners or controllers), consideration should be given to filing a STR. Also, where an attempted transaction gives rise to knowledge or suspicion of ML/TF, that attempted transaction should be reported to the FMU.

Once suspicion has been raised in relation to an account or relationship, in addition to reporting the suspicious activity BSPL should ensure that appropriate action is taken to adequately mitigate the risk of BSPL being used for criminal activities. This may include a review of either the risk classification of the customer or account or of the entire relationship itself. Appropriate action may necessitate escalation to the appropriate level of decision-maker to determine how to handle the relationship, taking into account any other relevant factors, such as cooperation with law enforcement agencies or the FMU.
